

賀春

2019年 元旦

With our warmest wishes for a happy
and peaceful New Year, 2019!

The arms race is accelerating in the world and unfortunately also in Japan. The energy policy of Japanese government is even behind the industry, and wastes the precious national expenditure. More unnecessary funds are eventually required as were after "Fukushima Dai-ich". Owing to the "strong" cabinet, there were many incidents which showed the lack of a sense of tension and responsibility among the cabinet members and the bureaucrats.

Last June we joined a tour to Belgium and Holland. We visited beautiful cities and enjoyed seeing the famous arts in many museums. Suehiro attended a conference, 'Energy Landscapes', organized by Xantheas and Wales in Kalamata, Greece, and met a few old friends. He enjoyed not only science but also sight-seeing the remains of old Greece. The walks for "Fifty-three Stages of the Tokaido" from Tokyo to Kyoto are now at Yui, Shizuoka. We could see the big Mt. Fuji. To complete the walks, we have 13 two-day walks. We look mentally and physically healthy. So we keep enjoying the travels inside and outside of Japan, and continue to commit ourselves to some social, educational and political activities.

Suehiro & Miyuki Iwata
