

賀春

2022年 元旦

By Yoko, suehiro's sister

With our warmest wishes for a happy
healthful and peaceful New Year, 2022!

For full two years the covid-19 has been dominating all over the world! The situation, however, differs among the countries, probably depending on the government policy and people's attitude. History of *the contagious diseases* tells us that vaccines are powerful arms to fight against the diseases, but they only protect us from the virus, SARS-COV-2. We have to reduce the chances of the spreads of the diseases, for instance, by social distancing, by wearing high-quality masks and by effectively venting rooms and cars. Besides, testing and hospitalizing the infected people are absolutely necessary. These three types of measures have to be taken in well-planned ways. We had two jabs before summer, but we have to wait for the third one till the middle of February.

We are healthy and are playing with Macs everyday. Suehiro continues to help students of Nagasaki Nishi High School and of Chiba Institute of Technology. Miyuki submitted a public comment on the Basic Plan on Energy Policy. This year we could not make any travels even inside of Japan, but enjoyed an-hour walks near home. We found several routes. This year we really hope to have few-days travels to prevent dementia.

Suehiro & Miyuki Iwata
